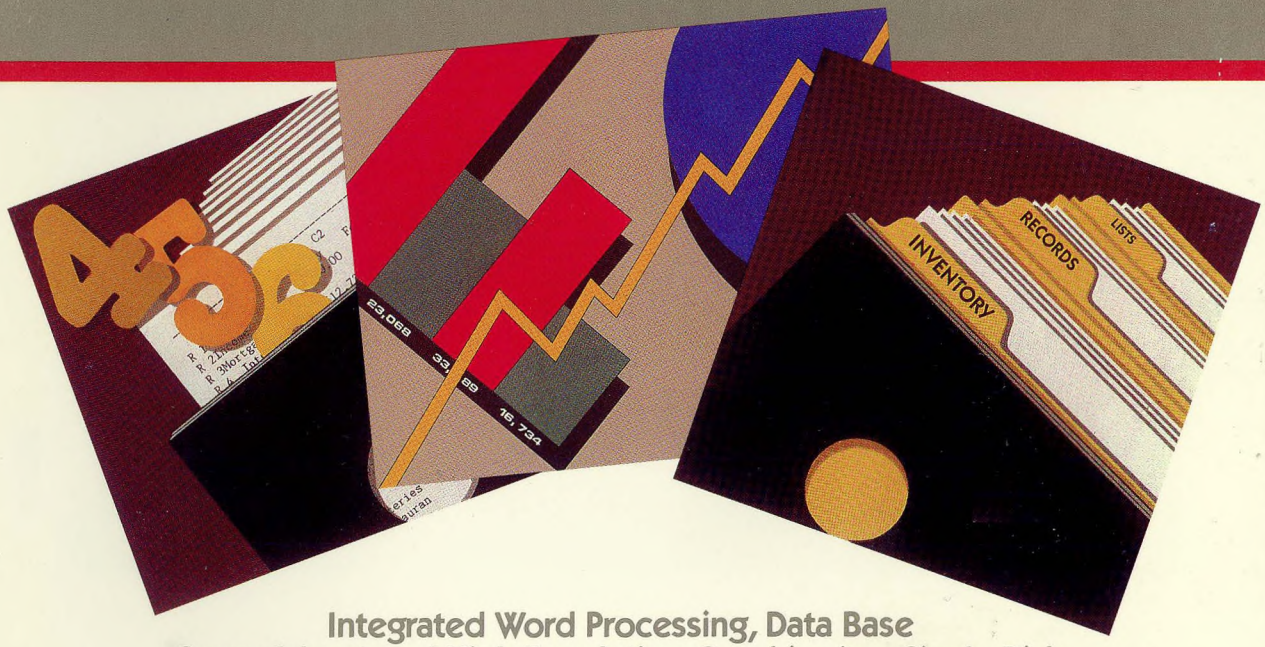
TEAM-MATE



Integrated Word Processing, Data Base Spreadsheet and High Resolution Graphics in a Single Disk

- Simple commands put you in total control of your documents, files, and calculations.
- View data simultaneously as you go from one module to another.
- Design reports and forms using information from any of the four modules.
- Links together and previews any number of pages on any number of disks.
- "Look-up" data in one cell to set up conditional test in analyzing budgets, forecasts and expenses.
- Create pie charts, line graphs, and bar graphs.

Requires Disk Drive

TEAM-MATE

It's a Data Base!

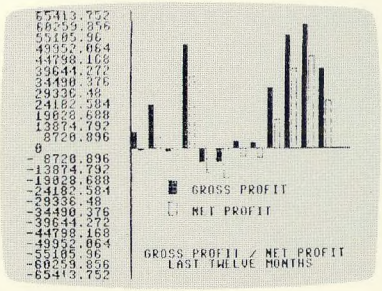
This computerized filing cabinet allows you to store and organize mailing lists, inventories, personal files and much more. These items can then be retrieved by category, name, index code or data range. Subfiles can be created for custom reports. Storage capacity yields up to 999 records with 17 fields per record, and 38 characters per field.

High Resolution Graphics!

You can create a pie chart which will graph up to nine values. Line graphs and bar graphs can display up to three variables in one chart. Both positive and negative values can be displayed. In the bar chart, each variable can have up to 12 horizontal increments; the line graph can display up to 50. Scaling can be automatic or you can define your own minimum and maximum values. Text mode is incorporated with each graphic screen. You can enter text to title a graph, to type in a full description of each variable. Full cursor movement is available.

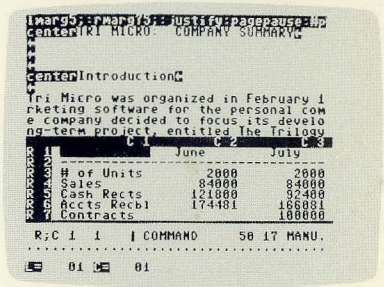
It's Integrated!

Because programs are integrated as a single system, data can be moved between the programs without ever having to swap disks or reload programs. A window capability allows data to be viewed in one screen, while working with another set of data in the other screen. This means you can generate and print customized reports and letters, with data incorporated anywhere in the written text.



It's a Wordprocessor!

Prepare professional looking documents by utilizing an 80 column screen format and simple commands that enable you to: vary margins, justify text, search and replace words or phrases, vary page and paper length, link unlimited amounts of pages, and move blocks of text between pages. Printer commands include shadow and bold printing, superscript, subscript, and centering. Print preview mode allows you to



preview your text before you print – view page breaks, formats, underlining, etc. Print preview works with integerated data so you can see where data will be positioned in word processing files. Perfect for form design and labels.

It's a Spreadsheet!

Performs tedious home, school or business calculations quickly and easily. Frequently used formulas can be duplicated throughout the 17 columns and 50 rows. You can assign a name to a a value, for use at another place in the spreadsheet. Conditionals can be performed on any value or formula to test theories or affect other values and formulas in the spreadsheet.
